Front Cover Artwork: Primary rat oligodendrocyte precursor cells (OPCs) were differentiated into oligodendrocytes for 3 d, and then fixed and stained for actin filaments (phalloidin, green) and the Arp2/3 complex (immunostaining, red), a key molecule that builds actin filaments in cells. Superresolution micrographs were obtained using a Zeiss Elyra Structured Illumination microscope. (Image credit: Brad Zuchero, Andrew Olson, and Ben Barres, Stanford Neurobiology.)

CHAPTER 6

INTRODUCTION

- Purification and Culture of Central Nervous System Pericytes 97
Lu Zhou, Fabien Sohet, and Richard Daneman

PROTOCOLS

- 1 Purification of Pericytes from Rodent Optic Nerve by Immunopanning 100
Lu Zhou, Fabien Sohet, and Richard Daneman

CHAPTER 7

INTRODUCTION

- Purification and Culture of Central Nervous System Endothelial Cells 111
Lu Zhou, Fabien Sohet, and Richard Daneman

PROTOCOLS

- 1 Purification of Endothelial Cells from Rodent Brain by Immunopanning 114
Lu Zhou, Fabien Sohet, and Richard Daneman

SECTION III. MYELINATING GLIA

CHAPTER 8

INTRODUCTION

- Purification and Culture of Oligodendrocyte Lineage Cells 127
Jason C. Dugas and Ben Emery

PROTOCOLS

- 1 Purification of Oligodendrocyte Precursor Cells from Rat Cortices by Immunopanning 132
Jason C. Dugas and Ben Emery
- 2 Purification of Oligodendrocyte Lineage Cells from Mouse Cortices by Immunopanning 146
Ben Emery and Jason C. Dugas

CHAPTER 9

INTRODUCTION

- Myelinating Cocultures of Purified Oligodendrocyte Lineage Cells and Retinal Ganglion Cells 161
Trent A. Watkins and Anja R. Scholze

PROTOCOLS

- 1 Myelinating Cocultures of Rat Retinal Ganglion Cell Reaggregates and Optic Nerve Oligodendrocyte Precursor Cells 165

General Safety and Hazardous Material Information

This manual should be used by laboratory personnel with experience in laboratory and chemical safety or students under the supervision of such trained personnel. The procedures, chemicals, and equipment referenced in this manual are hazardous and can cause serious injury unless performed, handled, and used with care and in a manner consistent with safe laboratory practices. Students and researchers using the procedures in this manual do so at their own risk. It is essential for your safety that you consult the appropriate Material Safety Data Sheets, the manufacturers' manuals accompanying equipment, and your institution's Environmental Health and Safety Office, as well as the General Safety and Hazardous Material Information in Appendix 1 for proper handling of hazardous materials in this manual. Cold Spring Harbor Laboratory makes no representations or warranties with respect to the material set forth in this manual and has no liability in connection with the use of these materials.

All registered trademarks, trade names, and brand names mentioned in this book are the property of the respective owners. Readers should please consult individual manufacturers and other resources for current and specific product information. Appropriate sources for obtaining safety information and general guidelines for laboratory safety are provided in General Safety and Hazardous Material Information (Appendix 2 of this manual).
